About the Presentation

How to Eat Candy
Depriving cariogenic bacteria of sugar is the cornerstone of traditional caries management, yet the science of CAMBRA (Caries Management By Risk Assessment) takes cariology to a whole new level.

If you’re still telling patients to, “Brush, floss, and use fluoride toothpaste” you’re going to be surprised by the myriad of treatment options available today.

*Streptococcus mutans* has more to fear than stronger fluoride and more of it, as dentistry embraces oral healthcare.

At the end of this course, participants will be able to:
• Identify risk factors leading to caries;
• Explain the role of commensals;
• Implement disease management in practice;
• Safely consume a variety of candy and sugary beverages;
• Prolong the life of restorations in all patients.

About the Presenter

*Dr. Brian Nový* is the Director of Practice Improvement at the DentaQuest Institute, and an adjunct associate professor of restorative dentistry. He serves on the ADA Council of Scientific Affairs, acts as the chair of the CAMBRA coalition, is a member of the AGD and a clinical evaluator for the Catapult Group. The California Dental Association Foundation presented him with the Dugoni Award for “Outstanding contributions to dental education,” and in 2009, the American Dental Association awarded Dr. Nový and his office the title, “Adult Preventive Care Practice of the Year.”
